

Dear,

My name is Camila, since I was a young person I have always been studious, sitting on the front chairs, in the classroom, and participated in study groups for tests. Studying has always been satisfying my needs around acquire knowledge. Therefore, in 2008 I started to live in Santa Maria, state of Rio Grande do Sul to study environmental and sanitary engineering. In 2013, I gained a scholarship for exchange to Ireland, where I had been for 9 months studying English and engineering. In Ireland I got fluency in English, acquire ability of listening and speaking.

Back to Brazil, I've finished the engineering course and got average grade above 8/10. Determined to find an internship in Florianópolis, state of Santa Catarina, I got one without even knowing someone from this local.

After that, I started to work with customer service at the companies Flex and Peixe Urbano. Nowadays, in 2022, I have started a programming course at SENAI, called DEVinHouse, where I have been studying front-end with JavaScript and ReactJS and back-end with Java and Spring. Also, I am learning SQL and agile methodologies.

I am determined, persistent, self-confident and I am searching for an opportunity to develop my programming abilities. I am easy learner and was outstanding student from the programming course's first module, with average grade of 9.9/10. My goal is focus on programming and work with that.

Kind Regards,

Camila Breda
